MAKASSAR CARDIOVASCULAR UPDATE - XXIII 2025

WELCOME MESSAGE

Dear Colleagues and Friends,

Cardiovascular disease is the leading cause of death globally, with 31% of all deaths in 2012 attributed to it. The number of deaths is predicted to increase, posing challenges for countries like Indonesia. Healthcare providers must utilize advancements to improve patient outcomes.

The South Sulawesi Branch of the Association of Indonesian Cardiologists is organizing the **MAKASSAR CARDIOVASCULAR UPDATE (MCVU) XXIII 2025** with the theme **"Emerging Paradigms in Acute Cardiovascular Care: Lifelines in Motion, Excellence in Every Beat"**

The event will include symposiums and workshops aimed at discussing the latest advancements in cardiovascular disease management. The goal is to invite healthcare professionals, researchers, and frontline workers in cardiovascular healthcare to explore and discuss these advancements, as well as the health challenges that arise.

The event aims to update healthcare professionals' knowledge on the latest breakthroughs and evidence-based practices in cardiovascular management. Additionally, it aims to promote collaboration between healthcare professionals, allowing them to discuss challenges and opportunities in the field and work towards positive changes in cardiovascular healthcare.

Akhtar Fajar Muzakkir, MD, FIHA
Chairman of MCVU XXIII 2025
